

ABOUT

A powerhouse of creative minds and tech experts, we turn bold visions into smart, real-world solutions. Innovation drives us. Impact defines us.

Smart Surveillance Solutions

Empowering Security with Artificial Intelligence

Our system powered by AI/ML and IoT to analyzes live camera data to detect suspicious activity in real time. It instantly sends alerts to web and mobile apps and enabling swift action to prevent theft and ensure maximum security.

Advanced Detection & Monitoring Systems

Tailored for Industries | Institutions | Smart Cities | Enterprises

- ✓ Real-Time Alerts
- ✓ Easy Integration
- ✓ High Accuracy
- ✓ Scalable & Reliable

VARIANTS

CCTV MONITORING SYSTEM

- Tamper Detection
- Power Loss Detection
- Screen Interrupt Detection

FACE ALERT

- Entry/exit face counting
- Real-time Monitoring
- Instant Notification

FACE ATTENDANCE

- Face Detection & Recognition
- Auto Attendance Marking
- Time & Date Logging

FACE MASK DETECTION

- Real-time mask detection
- Instant alert system
- Accurate person recognition

HUMAN DETECTION

- Smart Human Monitoring system
- Automatic Logging system
- Restricted Area Intrusion Detection
- Advanced Historical activity monitoring

HEAD COUNT

- Real-Time Face Counting
- Time & Date Logging
- Total daily people count log

Smart Vision Solutions – Customizable for Your Needs

We provide advanced AI-powered surveillance systems designed for flexibility and precision, compatible with both IP and Pi cameras:

Customizable to Client Requirements

Whether it's integration, analytics, or specialized alerts — we tailor the system to fit your environment.
